MEMORANDUM FOR THE RECORD

SUBJECT: NRC/House Energy Subcommittee Request for DDO Reports

1. On 16 March, PCS/PGLO/DDO [] informed me of a jurisdictional dispute which has developed between the NRC and Headquarters over passage of certain reports data to a House Subcommittee. The NRC has proposed that they provide numbers of certain DDO reports, including unspecified TD reports, to the House, apparently the House Energy and Commerce Subcommittee on Energy, Conservation and Power (Congressman Ottinger). DDO and OGC are apparently contending that Executive Order and third agency rules are and there is also a source security problem in providing the numbers of reports wholesale.

STAT

2. NRC has proposed that the respective counsels discuss the issue so Bernie Makowka is handling for OGC.

3. According to Susan, the preferred solution from Headquarters standpoint would be for DDI/OSR and perhaps others to brief interested and authorized Committee Members and staff on the subjects in question and to permit those being briefed to read certain of the related TD reports during the briefing.
